RESPONSE CLASSIFICATION

Institutional Response Ledger

The ledger separates transmission from acknowledgment, substantive response, action, dispute, and silence in the public record.

Method

• Normalize by unique issue and transmission. Do not count every copied recipient as a separate notice.

• Automated replies and delivery receipts are not substantive responses.

• Use “no public-safe response artifact linked” rather than “refused” when the record proves only absence from the public site.

Current ledger

• IRL-001: Substantive response - disputed - Implementation of February 11 order: contact, therapy, records, and logistics

• IRL-002: Substantive response - disputed - Scheduling, individual counseling, and in-person contact coordination

• IRL-003: Substantive response - disputed - Attendance notifications and Easter-contact nonresponse

• IRL-004: Substantive response - disputed - Written implementation position after therapy scheduling

• IRL-005: Substantive denial - Concern that adult litigation framing was reaching the child

• IRL-006: No public-safe substantive response artifact linked - Preservation notice concerning rejection and failure messages and system performance

• IRL-007: Human acknowledgment / routing instruction - Open letter, grievance record, and public-member review request

• IRL-008: Official procedural action - Rule 5 service and notice of post-judgment filings

• IRL-009: No public-safe substantive response artifact linked - Open letter: the May 12 order has not been made real

• IRL-010: Filed; no public disposition artifact linked - Rule 10(c) intake, preservation, and referral request
