JTFORME V38

Public Accountability Command Center

Owners, status, clocks, source records, requested remedies, and public checkpoints.

What changed

• Ten stable issue IDs now connect each major accountability lane to an owner, response status, elapsed-time record, requested remedy, source, limitation, and next review date.

Highest-priority open issues

• ACC-001: February 11 order implementation and adult logistics - Hearing scheduled

• ACC-002: Law Court usual-course directive and downstream implementation gap - Escalated; oversight referral filed

• ACC-003: York Judicial Center enforcement intake, service, and scheduling - Hearing scheduled

• ACC-004: eFileMaine notification multiplication and rejection-loop performance - Open; performance response not yet linked

• ACC-005: Maine Board of Overseers complaint handling and public-member review - Closed by dismissal; disposition disputed

• ACC-006: Rule 10(c) intake, preservation, and judicial-conduct routing request - Filed; routing disposition pending

• ACC-007: Public money to court-technology performance - Records and performance request ready

Operating rule

• One owner. One issue. One source packet. One requested action. One review date.

• No public-site response artifact is not treated as proof that no private or later response exists.
