

Reform Tracker Fast Read

A short guide to using the reform tracker as a public checkpoint page.

Best use

- Use the tracker after the dashboard, not instead of it.
- Use it to see what should be watched next in public, measurable terms.
- Use standards and source pages when someone wants to test whether the tracker is disciplined enough.

Read order

1. Use this page fast
2. Current tracker lane
3. What to watch next
4. Tracker standard

Pair with

- Dashboard scorecard
- Standards crosswalk
- Story Intake after the practical help lane is already clear

Reminder

- A tracker should not be a mood board. It should make the next visible checkpoint obvious.
