

# Standards Fast Read

A short guide to the rules the site should be judged against.

## Best use

- Use this guide when someone wants the public standards without reading the full page first.
- Use the crosswalk to see where the rules are supposed to show up across the site.
- Use the dashboard and evidence center to test whether the rules are actually visible.

## Core standards

- Children and families stay central.
- Receipts stay close to major claims.
- Promises stay measurable.
- Practical usefulness comes before conversion.
- Restraint beats clutter.

## Pair with

- Dashboard for the flagship public test
- Sources + Proof for the receipt trail
- Reform Tracker for visible follow-through
- About Justin for the governing posture behind the rules

## Reminder

- Standards matter only if readers can carry them into other pages and ask whether the site is actually following them.
